DETAILED ACTION

Claim Rejections - 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 1-9, 11-30, 32-44 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

Referring to the independent claims, the Applicant has amended the claims to recite receiving a set of video streams, selecting a subset of the set of video streams, and selecting a plurality of video streams from the video stream subset for the event. Therefore, a three-step process is occurring, the receiving step, selection of a subset step and selecting a plurality of video streams from the subset. The examiner notes that a three-step process is not supported in the specification. The sections pointed to by the Applicant in the Arguments section of the current amendment points to the Summary of the Invention, which only states that a set of video streams are received and then responsive to a user input, selected video streams are assigned to the output device. The examiner further notes that nowhere in the specification is the limitation subset stated. At best the specification only teaches a two-step process, where a set of

video streams are requested and only then are a plurality of the video streams selected upon receipt at the user's receiving device.

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter, which the applicant regards as his invention.

Claims 1-9, 11-30, 32-44 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Referring to the independent claims, the Applicant has amended the claims to recite, "omits ones of the video stream". The examiner cannot determine from the specification if the claim limitation "ones" is referring to a portion of a single video stream or one video stream from a plurality of video streams. The claim limitation "ones" fails to make this distinction.

The examiner further notes that the claim amendments made to claims have rendered the claims incomprehensible in regards to the teachings of the specification and therefore no art rejection can be made.

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
